

Rail Milling Technician

Rhomberg Sersa North America is seeking experienced Rail Milling Technician to work on our Rail Milling train. We are the first in North America with this technology and you will be part of our development of this leading solution across North America. These machines require sophisticated electronics or electrical and heavy plant knowledge. Positions will be based in Toronto Ontario area with travel to other sites primarily as required. Specific requirements include:

- minimum 5 years proven experience in electronic/electrical support of heavy equipment
- minimum of trade (mechanical, electrical or similar) or relevant tertiary qualifications (electrical engineering)
- flexibility to work various shifts ranging from 8-12 hours day/night
- preferred experience in railway environment
- current Driver License is required
- 100% commitment to safety in the work place
- a positive work attitude and quality workmanship is a must
- excellent communication and organizational skills
- successful applicants are required to pass pre-employment health assessment including D&A screening.
- current resume with at least two recent and contactable referees.

This is a career role for a railway professional. If you are up to the challenge to be the 'best in business' and 'best in world', join likeminded experts in our company who are the proven leaders in our market. Salary and conditions offered will be in accordance with your experience and skills.
